

StuyTCG by Senioritis

TNPG: Senioritis

project: StuyTCG

Target ship date: {2026-06-01}

roster: Tudor Ganshaw (PM), Amy Shrestha, Hannah Grimskog-Tran, Steven Wu

Name	Email	Primary Role	Secondary Role
Tudor Ganshaw	tudorg@nycstudents.net	JS Developer	PM
Amy Shrestha	amys90@nycstudents.net	SQLite	Flask Pathways
Hannah Grimskog-Tran	hannahg61@nycstudents.net	Flask Pathways	CSS
Steven Wu	stevenw92@nycstudents.net	HTML Templates	JS Developer

Summary

A web-based trading card game (TCG) themed around Stuyvesant. Users will be able to pull cards, show off their collections, and battle other users.

Problem Being Solved

We want to make a fun game to solve students' boredom.

Target Users

Who will use this system?

- People who want to play a TCG game
- Stuy students who want to play a game featuring their teachers

Why This Project Matters

There is a gap in the market for Stuyvesant teacher themed trading card games and we are filling that gap lest it become a crater. By playing the game, all Stuyvesant staff can better know different Stuyvesant teachers in various departments in Stuyvesant, familiarize with their addresses, and what they are known for.

Minimum Viable Product (MVP) Scope

Core Features (Required for Final Submission)

Features that **must** be completed:

1. Card battle system
2. Deck building system
3. Bot to battle against

Stretch Features (Only if MVP is Complete)

1. Multiplayer battling
2. Add more specials/cards (i.e., increase attack, etc.)
3. Win rate for different cards shown on the profile page

Explicit Non-Goals

Features intentionally excluded:

- knowing the other player's cards
- having an indefinite end to each battle
- simultaneous actions by players

Technology Stack

Layer	Selected Tool
Backend Framework	Flask
Frontend Framework	Tailwind
Database	SQLite
Authentication	Flask sessions

Why This Stack Was Chosen

Flask, Tailwind, and SQLite are all known and trustworthy. Specific frontend framework isn't too important.

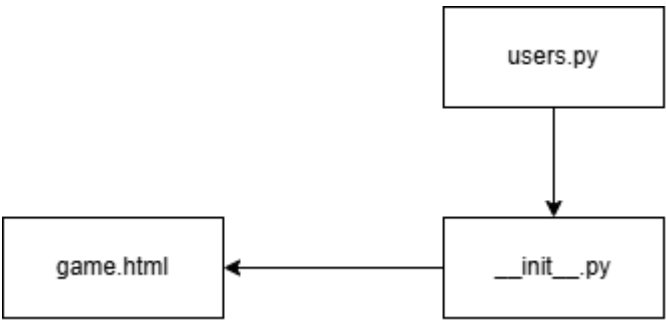

Team Ownership Plan

Each member must own meaningful deliverables.

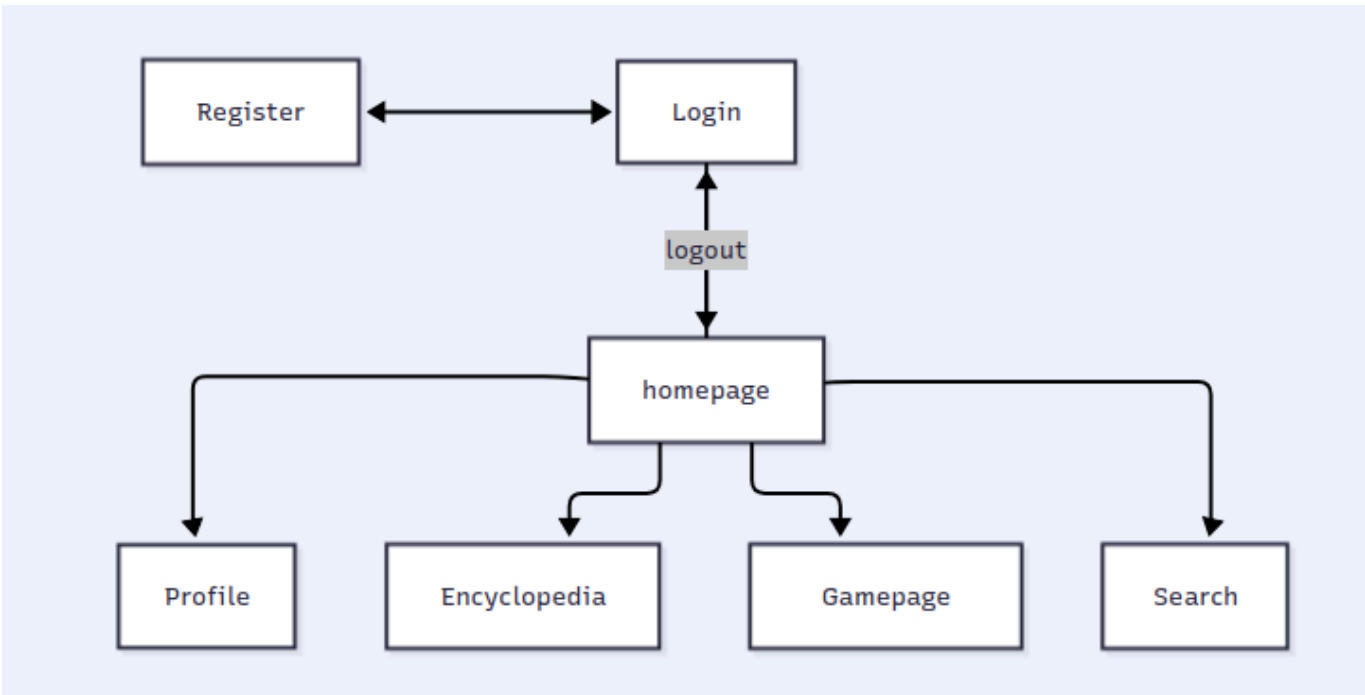

Team Member	Primary Ownership	Secondary Ownership	Specific Deliverables
Tudor	Game logic & implementation	PM leadership	Battle system logic & bot
Amy	Database design & application	Backend support	SQLite DB completed & deck storage

Team Member	Primary Ownership	Secondary Ownership	Specific Deliverables
Hannah	Flask routes & gameplay	CSS	Card display in profile/search & CSS
Steven	Frontend HTML templates	Refine JS in game	Hand deck & battle gameplay

Site map

Key User Stories

eg0

As a player, I want to be able to select and create decks of cards that can help me win battles so that I am able to win more battles and learn to utilize strategy.

eg1

As a student, I want to have a variety of teacher cards from a variety of departments so that I can familiarize myself with their names, faces, and address.

eg2

As a new user, I want to be able to easily understand and learn the game logic so that I can immediately start playing.

Database Design

USER_DATA

username	TEXT	PK

name	TEXT	
health	INTEGER	
attack	INTEGER	
defense	INTEGER	
speed	INTEGER	

Testing Plan

- Components will be tested as they're made and one more after they're "finished".

Timeline

Week 1 Goals:

- Functioning login system
- Functioning deck building system
- Functioning game against bot

Week 2 Goals:

- Trying to implement multiplayer
- If all else finished, perhaps expand scope of game (add more cards, make more complicated systems, perhaps add leaderboard or ranked system)

Week 3 Goals:

- Final touches
- Styling and UI

Internal Deadlines:

- Finished game against bot: 5-17
- Multiplayer: 5-24

Completion Criteria (*a.k.a.* "Definition of 'Done'")

Project is considered complete when all of the following are true:

1. Players can select a deck of 8 cards.
2. Players can battle with said cards in a functional game.
3. Players can have a decently fun experience with the game and understand what is going on.

Open Questions

- Do we want a leaderboard system?
- How do we want deck building to function?
- How many cards do we want to make?
